*These grids (above) show those BTB Members who have had the highest losses on the punt over the course of BTB History. By average losses per year on the left; total dollar losses on the right.

*The grid on the left shows the biggest collect each year of the BTB Tour. It includes the collect total; how much was outlaid; and the net profit from that bet.

*Robbo's Pocket Rocket holds the greatest bet in BTB history. An \$835 profit on a \$50 bet.

*#1 Craig's Carnival has lost more money on the punt in total dollars than anyone else in BTB history. Sort of figures though considering he's one of only 2 players who have been involved every single season. He's fighting back – last year's victory signaling the turnaround. He prays anyway. Other inaugural Mickaby is flying in comparison!

*#5 Ming Dynasty Dan is officially the worst punter ever in the BTB tour. His average losses combined with total losses make him the official 'Kiss Of Death' as at the end of BTB12!
